### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1-5 include dark blotches which make the drawings insufficiently clear. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Hilliard (US 2003/0190575) discloses an orthodontic alignment system, in which it is mentioned that an LED may be included within the device for novelty purposes. The present invention is deemed novel over Hilliard because the LED of the present invention is specifically claimed to be found in an orthodontic bracket. Furthermore, the LED must be capable of curing the photosensitive adhesive on the base. Means are provided for in the present invention, in the form of a window, which allow the radiation from the LED to be directed towards the base so the adhesive may be cured. An LED for novelty purposes, however, would most likely emit the radiation in the opposite direction, away from the base outside of the user's mouth. There are no means mentioned which would allow the radiation to reach through the bracket base and cure the adhesive. Thus, this LED

assembly is not disclosed to be capable of performing the same intended function as the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
